Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Claim 15, line 1 "shock absorbing apparatus" should be changed to
-- method --.
2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 4 and 10 and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Webb (2953352).

Figs 1a-1b of Webb discloses north pores 25, south pores 26 and piston 33, 21.

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 2-3, 11-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Webb (2953352).

The principal reference to Webb (2953352) discloses the invention substantially as claimed except for the particular shape of the piston 21 of Webb.

It would have been obvious at the time the invention was made to one having ordinary skill in the art to which the invention pertains to modify the principal reference to Webb to vary the shape of the piston to be funnel or bullet shaped since to vary the

shape as desired to adapt the shock absorbing apparatus to a particular environment

and utility. ^{would have been within the artisan's skill} A change in shape is generally recognized as being within the level of

ordinary skill in the art. Also, see MPEP 2144.04 under the heading "Legal Precedent

as Source of Supporting Rationale" re various changes in size and shape. In re Dailey

, 357 F.2d 669, 149 USPQ 47 (CCPA 1966) .

6. Claims 5-7 and 14-17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. Claims 8-9 are allowed.

8. Coston(4997037) discloses a shear pin 95 in a shock absorbing apparatus of an oil well.
